## Director's Corner

Shortly before the August 21st Solar Eclipse, the news reported that free solar eclipse viewing glasses were available from public libraries and it "went viral".

Public libraries were deluged with calls. Some callers became a little annoyed when informed that this was not the case.

But WAIT! We DO have material available for free, all the time, not just "once in a blue moon"

And it is as dazzling, spectacular, mind- blowing and awesome as any eclipse.

Now, how do we get that to "go viral"?
